As a Freelance Frontend Developer at Self Employed Web, I excelled in building responsive websites, like a Weather App, using HTML and React, demonstrating strong problem-solving and teamwork skills. My focus on performance optimization and user experience showcases my commitment to excellence and leadership in project management.

Experience

2024– PRESENT
Self Employed – Freelance Frontend Developer

Build responsive websites for two personal projects, achieving a 40% improvement in load times and enhancing JavaScript capabilities.

Collaborated with peers for feedback and improvement, simulating real-world teamwork scenarios.

Continuously optimized website performance and enhanced user interfaces to ensure a seamless user experience.

DECEMBER 2023 – MARCH 2024
She Codes foundation - Coding Mentor

Taught basic HTML, CSS, and JavaScript to peers and community members.

Guided learners in debugging and improving their coding skills.

Developed and shared small interactive coding projects to encourage hands-on learning.
